Forecast for Friday 10 Sep 2021

Weather: A damp and cloudy start to Friday with showers, the odd one of which might be heavy, moving across the park. The showers continuing through the day and remaining largely cloudy in between. Should the cloud break-up a bit over the course of the afternoon, the best of any brighter spells will be in the east, though this could also help trigger a heavier shower. Showers fading away into the evening, but still staying cloudy.

Chance of cloud free mountain/hill tops above 600m: Generally 20% through the day.

Visibility: Cloud bases at 500-600m for much of the day, bringing poor visibility and obscuring higher slopes. Bases dropping further to 200-300m in association with any showers. These showers will also result in poor visibility conditions. At lower levels, outside of any precipitation, visibility moderate to good.

Forecast for Saturday 11 Sep 2021

Weather: Another cloudy start to Saturday, with the risk of an isolated shower through the morning. The cloud will gradually begin to lift from early afternoon with some brighter spells developing and the risk of showers and drizzle reducing. These clear spells then continuing into the night.

Maximum wind: Winds on the summits initially westerly 20mph, easing to 10mph in the afternoon.

Chance of cloud free mountain/hill tops above 600m: 30% through the morning, slowly rising to 70% by the evening.

Visibility: Cloud bases through the morning at 400-500m, obscuring slopes and summits in poor visibility. Any showers or drizzle also reducing visibility to poor as cloud drops to 300-400m. The cloud will lift through the afternoon, so that by the evening it will be above the summits, helping visibility to improve.

Temperature: **Valleys:** Plus 15 Celsius, rising to plus 20 Celsius.

At 600m: Plus 11 Celsius.

Freezing level: Above the summits.
